INTRODUCTION TO SPORTS SURFACES STANDARDS EN 14904

WHAT IS IT?

The construction and installation of sports floorings in Europe is set out in EN 14904*, which specifies certain requirements for multi-use sports surfaces in indoor facilities. It has been mandatory since February 2008, and replaces older local standards across the European Union.

WHY IS IT IMPORTANT?

The requirements of this standard act as a guarantee of finding the best compromise of:

- A safe and adapted surface for sports performance and comfort.
- A durable and resistant flooring throughout its lifespan, for a better return on investment.

HOW CAN I BE SURE THAT A PRODUCT IS OF EN STANDARD?

Managed by independent certified testing bodies, the tests conducted are based on strict criteria, whose exact results are shown in official test reports. These reports are the guarantee that the product you've chosen meets the requirements.

EN 14904

Requirements for safety in use	Standards	Requirements
Friction	EN 13036-4	80-110
Shock absorption	EN 14808	≥ 25%
Vertical deformation	EN 14809	≤ 5mm
Vertical ball behaviour	EN 12235	≥ 90%
Resistance to a rolling load	EN 1569	≤ 0.5mm
Resistance to wear	EN ISO 5470-1	< 1g for resilient systems < 0.08g for hard floorings
Reaction to fire	EN 13501-1	According to standard
Resistance to indentation	EN 1516	< 0.5mm
Resistance to impact	EN 1517	< 0.5mm
Formaldehyde emission and content of pentachlorophenol	EN 717-1 EN 717-2	Declaration
Specular reflectance	EN 13745	According to standard
Specular gloss	EN ISO 2813	≤ 30% at 85° angle ≤ 45% for lacquered surfaces

3 SPORTS SURFACE CLASSIFICATIONS

PERFORMANCE

Vertical ball behaviour

A uniformly reactive surface provides a consistent ball bounce, close to the rebound on a concrete slab.

Shock absorption

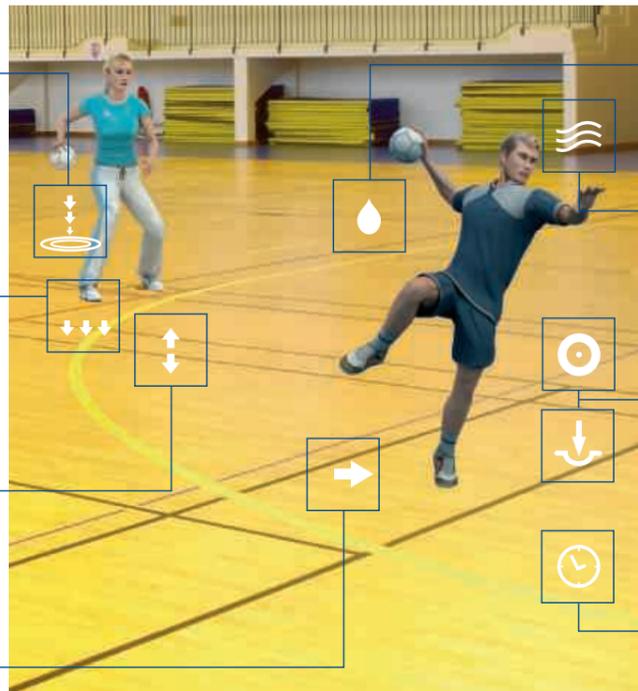

- Improve comfort of the player by decreasing the risk of wound.
- Choose the right level of shock absorption according to the weight of the athletes and the level of performance required.

Vertical deformation

A limited vertical deformation provides good foot support, reactivity and playability, as well as a consistent surface behaviour, for more safety.

Friction

Good surface friction must be balanced to control the grip support and sliding required for acceleration, deceleration, and sudden changes of direction without risk to the athlete.

HEALTH & HYGIENE

Hygiene

Strengthen the resistance of the sports surface to scratches and stains - where germs can develop - with efficient surface treatments.

Low TVOC emissions

All Tarkett floors contribute to better air quality with under 100µg/m² TVOC emissions (after 28 days) - 10 times lower than standard level.

DURABILITY

Resistance to indentation and rolling load

Floorings must be resistant to static load, indentation and pressure marks thanks to their inner construction, as well as resistant to tear when heavy furniture, both static and rolling loads, are moved.

Resistance to wear

Cleaning and maintenance represent 92% of the cost of a floor over its lifetime. Save time and money with surfaces treatments engineered to require fewer cleaning agents.

Point-elastic floor

A surface that provides deflection only at or close to the point of impact - for example vinyl floorings with cushion backing.

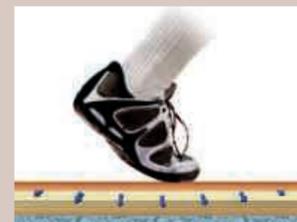

- + Comfort and safety

Type of users: For younger users of low to medium weight, looking for underfoot comfort and support.

TARKETT SPORTS SOLUTION

Omnisports

Area-elastic floor

A surface that deflects the force of point impact over a relatively large area - for example parquet floors.

- + Performance & shock absorption for competition level

Type of users: adult athletes, medium to heavier weight requiring reactive surfaces.

TARKETT SPORTS SOLUTION

S'Match-it
+ Lumaflex Duo
Linospport
+ Lumaflex Duo
Omnisports Compact /
Speed

Combined-elastic floor

Area elastic floor with a point elastic top layer, which provides both localized deflection and deflection over a wide area of the force of point impact - typically cushion vinyl floors over a sub-construction.

- + Comfort, safety, performance, versatility

Type of users: all athletes.
