LINOVILLE

THE ULTIMATE
FLOORING EXPERIENCE

Linoville at the edge of tradition and innovation

Our linoleum is made in **Narni, Italy**, to the same original recipe **since 1898**.

Tarkett's teams have an intimate understanding of every natural ingredient in order to adapt manufacturing to the variations of each year's crop.

Linoville combines **tradition, craftsmanship and innovation** to meet the needs of consumers worldwide and provide them with a unique experience.

We continue to innovate in colours, designs and technical characteristics for specific uses such as acoustic comfort in Education or Electrostatic Discharge (ESD) control.

Closed-loop circular economy

Our **Cradle to Cradle**[®] approach ensures we design our products to positively contribute to the environment and people's well-being at each step of the product's life, while supporting the transition to a circular economy business model.

Good materials

You care about choosing a flooring made from natural and high quality ingredients?

In making linoleum, we use materials that contribute positively to people's health and the environment. Closed-loop design starts here, so that good materials become future resources that can be reused or returned to nature as biodegradable ingredients.

- **94% natural raw materials** - linseed oil, resin, calcium carbonate, jute and wood and cork flour.
- **78% from abundant renewable resources** - including local suppliers. We support local linen producers to reduce our carbon footprint.
- **100% of ingredients have been positively assessed** according to Cradle to Cradle® framework for health and environment. As such Linoville exceeds European REACH regulation requirements.
- **100% recyclable** - Linoville offcuts can be fully reused as raw materials for future products or packaging through our ReStart® Program.

Resource stewardship

You want a linoleum produced in a responsible way?

Driven by the standards of our World Class Manufacturing program for continuous improvement of processes, we reduce our operational impact and preserve the environment.

- **Pioneering the new ISO14067** product carbon footprint certification, in addition to existing ISO9001 quality, ISO14001 environment, ISO50001 energy and OHSAS 18001 safety management certification.
- **Saving 80 million litres of water** every year through closed-loop water circuits.
- **Cutting 2,100 tons of CO₂ eq emissions** per year - the equivalent of a 8,402 km car journey.
- **Producing electricity, heating and cooling power** from a single device (a gas engine) to increase energy efficiency in a profitable and sustainable way.
- **Increasing renewable energy use** through photovoltaic panels, a biomass boiler and a geothermal heating system to decrease the Green House Gas (GHG) emissions.

Reuse

You want to play a role in ensuring a sustainable future?

We recycle at every step of the linoleum life cycle to upcycle waste and avoid landfill. We believe products should no longer have an end of life, but an end of use to then become resources for new products. Join us in the transformation towards a circular economy.

- Linoville is **100% recyclable**, from linoleum paste and surplus jute to powders.
- **By recycling 1,600 tons** of linoleum annually, we reduce our need for virgin raw materials.
- Our dedicated **ReStart®** recycling program helps customers worldwide to collect and recycle installation offcuts.
- Our objective is **0% production waste by 2020** at Narni.

People-friendly spaces

You care about the comfort and well-being of users?

We create flooring designed for improved indoor air quality that respects people's health and well-being. Linoville enhances people's everyday visual experience, through colors and patterns, as well as through acoustic or underfoot comfort. All of which offer key advantages for schools, universities and hospitals.

- **Research** on how best to use color and design to enhance aesthetics and ergonomics for stimulating, productive or restful environments.
- **Innovation** for a better sound and thermal insulation, and for improved underfoot comfort.
- **Good air quality:** VOC emissions (<100µg/m³) 10 times lower than the most stringent industry requirements.
- Naturally phthalate-free.
- Natural bactericidal qualities.
- **Hardwearing and resistant**, Linoville x²™ surface treatment simplifies cleaning and maintenance, which means 3.7% less water usage, 8.9% less electricity and 25% less detergent.

Closer to sustainability

Tarkett was the first linoleum flooring manufacturer to be Cradle to Cradle certified™ - underlining our strong commitment to sustainability.
