Wetroom Concept

WATERPROOF SYSTEM

> Floors, walls and accessories
> Unique design concept
> Hygienic and easy to maintain
With the Wetroom concept from Tarkett, you have all the benefits of a complete system: floor and wallcoverings as well as all the accessories you need: drains, threshold strips, sleeves...

Numerous applications:
Ideal for wetrooms in healthcare establishments (hospitals, care accommodation, etc.), this concept also meets the requirements for wetrooms in student halls, sports centre changing rooms and rehabilitation centres with a wet environment.

In the search for well-being, wetrooms are strategic areas.
The perception you have of yourself also comes from seeing your reflection in the shower-room mirror: if it’s “flattering”, it creates a feeling of well-being and a positive outlook which has a particular influence on patients’ powers of recuperation and the good humour of residents of nursing homes...

Tarkett Environmental Intelligence
We see our Intelligent Flooring Solutions as part of the world’s ecological system – and make strong efforts to secure that all our activities are based on respect for the environment. All our flooring products (Vinyl, Linoleum and VisionLine) are developed, produced and handled with a great concern for sustainability and environment. We call it Environmental Intelligence and live by this principle in every single step, from vision to waste.
“Functional, easy to use, hygienic, ergonomically designed... in the quest for well-being, a wetroom is essential”

Introduction

“Seeing yourself, loving yourself... it's taking care of yourself as well.”

New Wetroom concept collection from Tarkett:
This complete system for equipping wetrooms has been developed with users at the heart of the design process. It contributes directly to the quest for well-being and brings a human touch to public establishments and in particular those involved in healthcare.

Discover the 3 new colour ranges to create 3 worlds of “well-being”:
• Soft and relaxing
• Warm and comforting
• Fresh and dynamic
Soft and relaxing

.. softness ... cotton ... purity ...
Create a peaceful atmosphere based on the purity of whites and the clarity of neutral colours.

The softness of natural light reflected on the walls creates tranquillity and serenity.

“Like in a cocoon.”
The lightness of mineral colours combined with delicate designs, lightens the atmosphere.
A real “breath of fresh air”.

.. relaxing ... neutral ... clean ...

Wallcovering: Aquarelle Wall HFS

Floorcovering: Granit Multisafe

A few suggestions for dryroom floors

Acoustic vinyl

Compact vinyl
Warm and comforting

... sun ... earth ... clay ...
Create sunny mornings. Combined with the warmth and dynamism of yellow ochres, red ochres warm the room... the rooms seem filled with sunlight.

Natural tones reminiscent of tints and ochres from the south of France create “a reassuring and comforting atmosphere”.

The brightness of the warm tints creates a dynamic, summer atmosphere in the room.

Wallcovering: Aquarelle Wall HFS

Floorcovering: Granit Multisafe

A few suggestions for dryroom floors

Acoustic vinyl

Compact vinyl
Fresh and dynamic

.. lagoon ... ocean ... sea ...
Create invigorating mornings.
The freshness of revitalising cool blues combine with aniseed tints for a particularly stimulating effect.

The room is transformed into a spa for energising moments with iodine blues reminiscent of the sea or relaxing aquatic greens.

Water’s sensations and beneficial effects are thus enhanced in the room and also in the mind of the user.

Details and accessories

- Stosett sleeve
- Junction coving
- Threshold
- Flooring: Granit Multisafe
- Wallcovering: Aquarelle Wall HFS
- Welding using welding rod
- Drain
Ergonomic
The absence of a tray makes access to the shower area easy, especially for people with reduced mobility, and ensures great freedom of movement.

Comfortable
The flooring is pleasant to bare feet, the bright and uplifting colour ranges are perfectly suited to all types of wetroom.

Impermeable
A reliable and water-resistant process: the hot welded joints mean the wall is completely covered, for total impermeability.

Safe
Class C non-slip flooring (best category at $\alpha > 24^\circ$ according to DIN 51097) for optimal safety.

Hygienic
Floor and wallcoverings in 2m wide sheets minimise the number of joints and are therefore easy to maintain. Wallcoverings are anti-bacterial and anti-fungal for maximum hygiene.

Experience and guarantees
Tarkett’s wetroom concept relies on more than 25 years of experience throughout the world.

“Numerous advantages, unrivalled experience...”
