HETEROGENEOUS VINYL

Omnisports

LET'S PLAY

TarkettSPORTS THE ULTIMATE SURFACE EXPERIENCE
Omnisports provides ideal innovative floorings for young athletes and children. For them, performance and pleasure should be their only concern. Omnisports floorings meet the highest environmental and health standards allowing sports to be played in stimulating and safe surroundings.
INTRODUCTION TO SPORTS SURFACES
STANDARDS EN 14904

WHAT IS IT?
The construction and installation of sports flooring in Europe described in EN 14904*, which specifies certain requirements for multi-use sports surfaces in indoor facilities. It has been mandatory since February 2008, and replaces older local standards across the European Union.

*The EN standard is the basis of the EC marking for indoor sports surfaces.

WHY IS IT IMPORTANT?
The requirements of this standard act as a guarantee of finding the best combination of:
- A safe and adapted surface for sports performance and comfort.
- A durable and resistant flooring throughout its lifespan, for a better return on investment.

HOW CAN I BE SURE THAT A PRODUCT ADHERES TO AN EN STANDARD?
Managed by independent certified testing bodies, the tests conducted are based on strict criteria, whose exact results are shown in official test reports. These reports are the guarantee that the product you’ve chosen meets the requirements.

SPORTS FLOORING SOLUTIONS TO MEET ALL YOUR NEEDS

SPORTS FLOORING (EN 14904 CERTIFIED)

SCHOOL, COMMUNITY & SPORTS HALL
Omnisports Reference, Excel & PurePlay
SPORTS PERFORMANCE
- Optimal safety, comfort and sports performance
- Approved by sports federations
- GreenLay installation option*
- Recommended applications: school use, handball, basketball, volleyball, futsal etc.

LEISURE, FITNESS & WELLNESS CENTRE
Omnisports Speed & Training
COMFORT
- Walking and acoustic comfort
- Specific Badminton kit in Omnisports Speed
- Recommended applications: table tennis, badminton, fitness, wellness centre, boxing etc.

TRAFFIC AREAS
Omnisports Compact
RESISTANCE TO TRAFFIC
- High mechanical resistance to indentation and tear
- Easy circulation of rolling loads
- Recommended applications: corridors, lockers**, entrance halls, meeting rooms, weight rooms etc.

* see pages 13&16
** according to Tarkett maintenance instructions
*** without direct access to wetrooms
OMNISPORTS, ENJOY PLAYING, BE PROTECTED

**HIGHER PERFORMANCE**

Choose the right product for your facility, from practice in schools to competition level.
- Enhance sports performance thanks to good energy return.
- Guarantee an adequate & consistent level of ball bounce for handball, basketball, futsal and other sports.
- Provide a better grip when sliding.
- Reduce fatigue throughout sports practice.

**BETTER PROTECTION**

**ENSURE PURE SURROUNDINGS**
- Contribute to a healthier environment thanks to phthalate-free technology.
- Contribute to cleaner air for optimum physical exercise.
- Avoid harm to lungs during exercise thanks to extremely low VOC emissions.
- Help prevent adverse effects to children's health: US certified asthma & allergy friendly.

**PLAY SAFE**
- Help prevent injury with integrated cushion for protection in the case of a fall.
- Reduce long-term impact and injury: Adapted shock absorption levels for all ages, weights and levels of play.
- Protect players against potential friction burn.

**MORE COMFORT & PLEASURE**

**EASY TO MAINTAIN & DURABLE**

- Benefit from resistance to stains and scratches during daily use.
- Appreciate high resistance to indentation marks and rolling load.
- Reduce maintenance costs by 30%:
  - TopClean XP™ engineered surface treatment.
- Choose Greenlay installation option:
  - 20% time reduction
  - 98% adhesive free
  - Easy removal
- 10 year warranty

**GUARANTEE GOOD UNDERFOOT COMFORT.**
**REDUCE NOISE LEVELS THANKS TO CUSHION VINYL ACOUSTIC.**
**ALLOW FOR PERSONALIZED INSTALLATIONS WITH A CHOICE OF 35 COLOURS.**
**BOOST CHILDREN'S ENERGY LEVELS WITH VIBRANT COLOURS.**

**ENSURE PURE SURROUNDINGS**

PLAY IN A HEALTHIER ENVIRONMENT

Indoor air quality is essential for the health of athletes. Indoor air may be 2 to 5 times more polluted than outdoor air, contributing to the development of asthma and allergies, especially due to volatile organic compounds (VOCs).

- Athletes are more sensitive to indoor pollution. Indoor sports facilities promote health consciousness through physical activity, and shouldn’t expose athletes and more importantly children, to severe health risks.
- When you practice sports, your respiratory system is particularly exposed to air pollution.

Omnisports is designed with low VOCs to improve indoor air quality.

OMNISPORTS REDUCES THE RISK OF EXPOSURE TO PHTHALATES

In 2009, Tarkett launched the first vinyl flooring range with phthalate free technology, designed with renewable plasticizers which are also used in the children’s toy industry.

OMNISPORTS CONTRIBUTES TO PREVENTING LUNG DISEASE DUE TO LOW VOC EMISSIONS

All Tarkett Sports floors contribute to better air quality with under 10 μg/m³ VOC emissions (after 28 days) – ten times lower than standard levels.

OMNISPORTS DECREASES THE EFFECT OF ADHESIVE POLLUTANT

Greenlay® installation method is unique and healthy, improving air quality with minimum use of adhesive.

PLAY SAFE

Protecting players is our first concern. Omnisports provides different levels of shock absorption, impact deflection, friction and playing characteristics adapted for the different ages, weights and skill levels of sports users.

- Omnisports integrated cushion floorings help prevent injury and reduce fall impact.
- Homogeneous Omnisports embossed surface and treatment contributes to limiting friction burn risks and provides safer protection with anti-slip grip on all patterns and colours.
- Adapted shock absorption levels reduce long-term impact and injury.

Shock absorption levels vary according to players’ weight

Exposure risk with indoor pollution

Omnisports integrated cushion floorings help prevent injury and reduce fall impact.

- **Lightweight players**
  - Best option: Omnisports Reference, Excel & Pureplay

- **Heavyweight players**
  - Best option: Combined-elastic (Lumafl ex range) or area-elastic (wood) surfaces
PERFORM WITH PLEASURE AND COMFORT

Tarkett’s range of sports flooring meets the evolving needs of young athletes. Omnisports provides the perfect solution to improve user’s performance from low to high level in a comfortable environment.

- Omnisports point-elastic surface offers good energy return. Its highly cellularized foam backing provides deflection only at or close to the point of impact. It offers the right balance of shock absorption and vertical deformation to reduce muscle fatigue with good foot support and surface playability.

- Omnisports offers improved acoustic comfort. Tarkett Sports has engineered its flooring to reduce sound transmission and improve overall acoustic comfort for athletes and spectators.

### Acoustic reduction and comfort

*Reduced transmission of impact sound. Approximate values based on internal testing.*

Boost players’ energy levels with vibrant colours.

- Uniformly reactive surface for consistent ball bounce
- Better grip control when sliding to support sport movement
- Uniformly reactive surface for consistent ball bounce
- Reduced transmission of impact sound
- Good underfoot comfort
- Adapted vertical deformation
- Reduced risk of joint erosion
- Prevention of muscle fatigue

Reduced transmission of impact sound

Boost players energy levels with vibrant colours.
Greenlay is a sustainable loose-lay installation method – only 2% of the surface is glued – offering an economical and easy installation solution. This unique method is made possible by:

- The product’s exceptional dimensional stability (0.10%)
- Omnisports Reference, Excel & PurePlay’s weight
- The honeycomb backing, creating a suction effect

**EASY & DURABLE**

**Easy to maintain**
Omnisports floorings are highly resistant, designed to provide durable surfaces and to reduce maintenance costs.

- Unique product construction with solid, heavy and dense calendared sheet: resistant surface to indentation and impact.
- Engineered TopClean XP™ surface treatment for easier and ecological maintenance: reduced water and chemical agent consumption.
- Unique 2m roll width: 30% less welding required, decreasing the areas at risk of soiling.

**GREENLAY UNIQUE INSTALLATION METHOD**

**Exceptional resistance to indentation**

**SURE & EFFICIENT**

- EN 14904 compliant
- Over 1 million m² installed over 20 years
- 10 year warranted installation method

**QUICK & EASY TO USE**

- Reduced installation time by 20%
- Immediate setting in traffic

**SOLVING JOBSITES NEEDS**

- Easy access to subfloor after installation without damaging the subfloor
- Resistance to rolling load

- Resistant to rising moisture (up to 10% CCM)
- Compatible with heated subfloor

**RESTART**

Comprehensive collection and recycling service of flooring off-cuts:

- Optimizes jobsite waste management.
- Contributes to reducing jobsite waste.
- Guarantees traceability of collected off-cuts.
- Integrates sustainable development and anticipates European regulations requirements.
**CHOOSE YOUR COLOURS AND PERSONALIZE YOUR PROJECT**

**SUBFLOR SPECIFICITIES**

- Floor unevenness
- It has to be checked to make sure all holes and bumps do not exceed 6 mm height and depth under a 3m ruler.

**INSTALLATION AND FINISHING ACCESSORIES**

### Installation accessories

- **GREENLAY® GLUE**
  - Dual-component glue (A+B)
  - 1 box of 12 ltr each

- **GREENLAY® TARKOTAPE**
  - Double-sided adhesive for Greenlay® installation
  - 1 box of 2 rolls of 32m each

- **DOUBLE-TAPE UNROLLER FOR TABLE TENNIS SOLUTION**
  - Article code 0101080

- **TARKOLAY UNDERLAYER**
  - Moisture barrier for wet substrates creating neutral ventilation
  - Thickness: 1.5mm

Providing that the subfloor respects local standards. For detailed information please refer to complete installation guides.

* Not exposed to rising moisture

Full PU glued solution also possible for wet substrates. Please contact Tarkett technical services for specific guidance & information.
Omnisports sports surfaces are treated with TopClean XPr™. It’s a UV-reticulated polyurethane surface treatment, which offers excellent resistance to wear and tear due to daily sports practice.

General advice
- Installation of doormats at the entrance of the gymnasium to catch humidity, dirt, dust etc. They must be at least 3 strides long (approx. 1.5m).
- Usage of appropriate shoes: white soles dedicated to indoor sports practice.
- Non sporting events (exhibitions, concerts, dinners...) in sports hall: sports flooring protection required.
- Always follow manufacturers’ recommendations (detergent, cleaning machine...).
- Heavy rolling load (trolleys, forklift etc): sports flooring protection required - (please see p.19 for detailed information about our Protection solutions).
- Non sporting events (exhibitions, concerts, dinners...) in sports hall: sports flooring protection required.
- Usage of appropriate shoes: white soles dedicated to indoor sports practice.
- Stain removal (if and where it’s necessary)
- Machine cleaning should be used to remove work site stains (glue, paint...) according to the nature of the stain.

PERIODICAL CLEANING

2. Heavy soiling

- Machine cleaning: use a scrubbing machine fitted with white soft brushes or red pads at medium speed, or use rotocleaner
- Use an alkaline detergent (pH 7/8) with a 10% dilution
- Apply the mix with flat vacuuming and let it soak into the floor for 5 minutes and then vacuum the surface
- In case of chalky white marks, rinse with clear water

3. Stain removal

- For stubborn stains on the floor (for example: handball players’ resin) on goal posts, on seats etc.: use an alkaline detergent (pH 13/14) dilution 20% in spray, let it work during 1 minute and sweep with a white clean cloth

COMPLEMENTARY SOLUTIONS

Wall protection: PROTECTWALL

Economical, design and resistant wall protection solution:
- 41 exclusive and matching designs & colours with Omnisports
- Protects walls against shocks and impacts – no reparation costs
- Easy maintenance thanks to TopClean XPr™ surface treatment
- High flexibility for easy installation
- Full accessories package for perfect finish

Integrated watertight and hygienic system including:
- Slip resistant floorings:
  - Homogeneous vinyl (Optima
    Multisafe, Granit Multisafe, Granit Safe.T)
  - Heterogeneous vinyl (Multisafe Aqua)
- Coordinated heterogeneous vinyl wall covering (Aquarelle Wall HFS)
- Full range of accessories for perfect finish (welding rods, coving, drains, thresholds, pipe collars)

PROTECTION

PROTECTION FOR PROTECTILES+

Textile protection tiles
1 box of 10 pcs = 20m²
Total weight: 3.18kg/m²
Total thickness: 5.2mm
