STIX P956 2K : formulations based on a polyurethane technology with more than 0,1% weight of total monomeric diisocyanates will be submitted to special recommendations on labelling and a specific training (from February 2022, this training will be available and mandatory for the professionals. Up to this date, no change in the way to bring and use the product on the market).

Note: Although Tarkett may recommend a selection of manufacturer adhesive, we do not however guarantee the products listed. The list of products and manufacturers are not guaranteed complete or current. Tarkett would not accept any liability for any of these products failing to perform in conjunction with any of their products.

It is the responsibility of the adhesive manufacturer and flooring contractor to ensure the products being used are appropriate for use and applied in accordance with the manufacturer recommendations.
