Woven

For more than 130 years, Tarkett has been at the foundation of **creating more beautiful spaces**, unlocking the **infinite possibilities** that happen when **we come together**.

We believe in the power of collaboration, going the extra mile and investing in the future. **Please join us.**

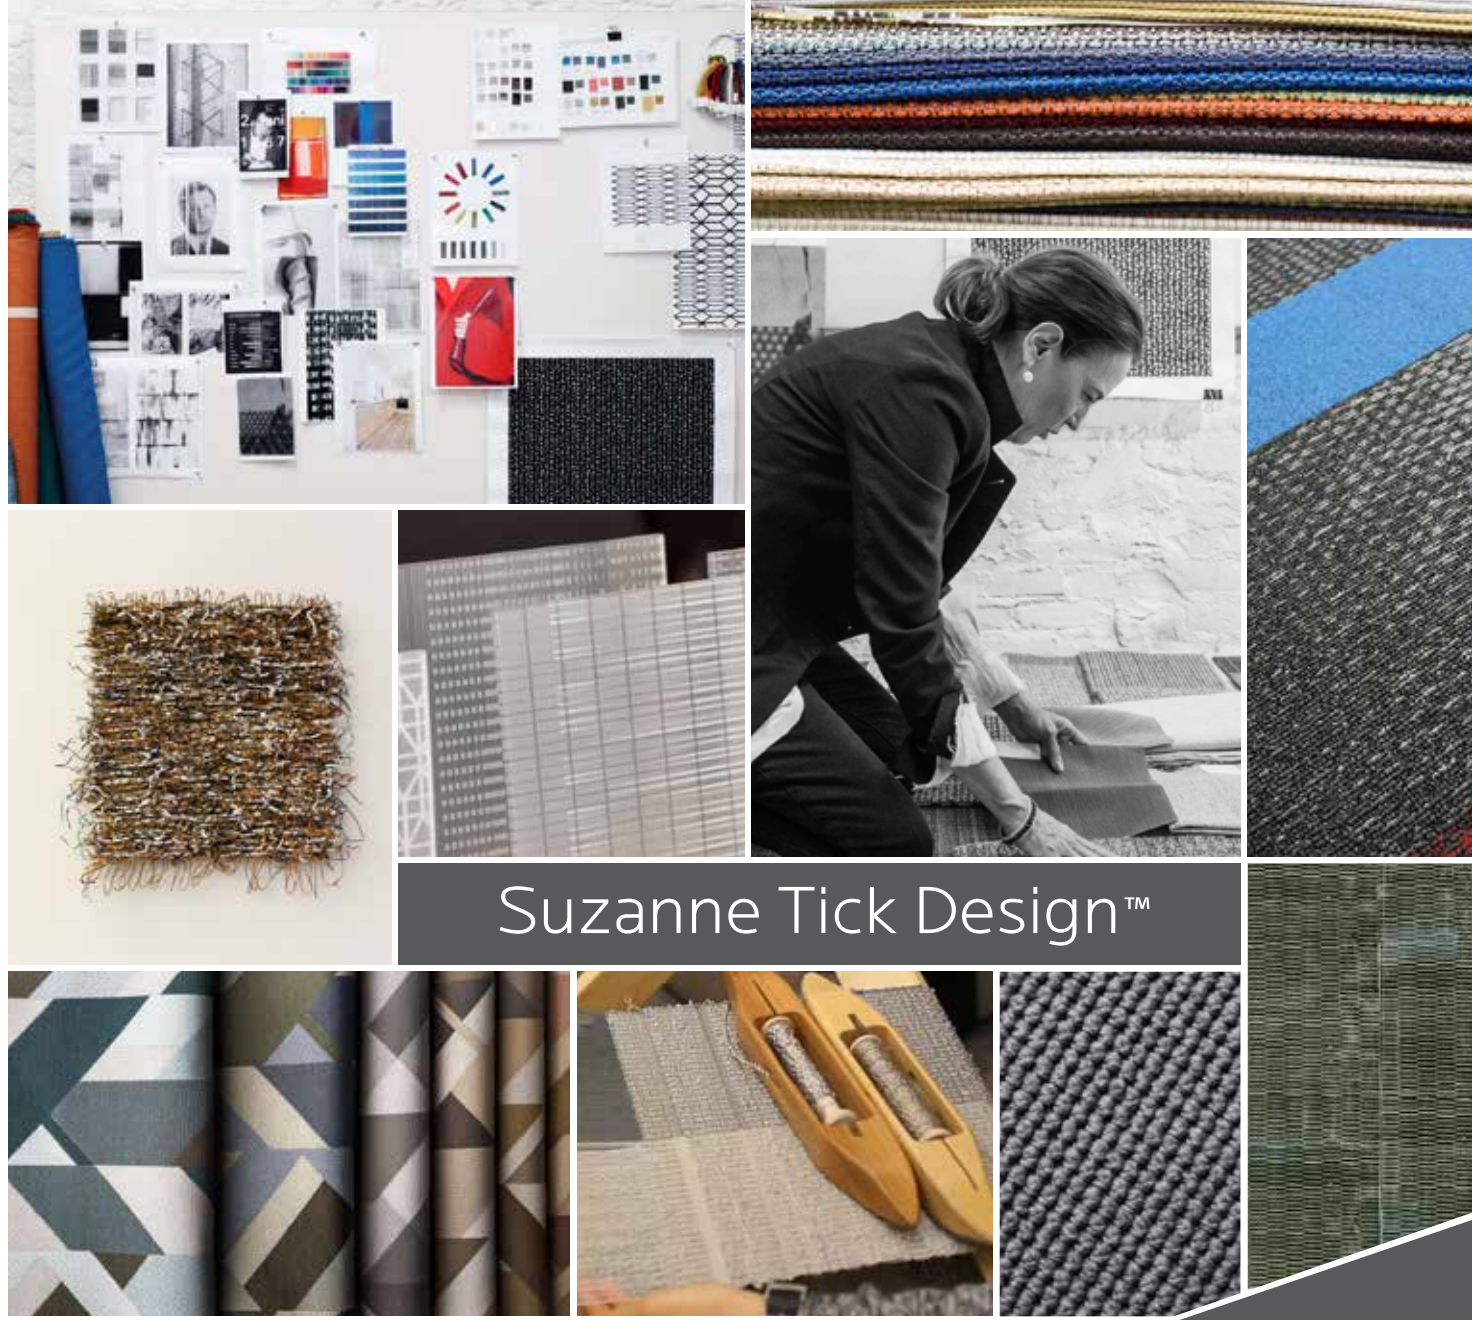

Welcome to
Tarkett.

CREATING TOGETHER

The power of collaboration.

Tarkett believes deeply in the value of collaboration, in bringing together different voices and ideas to create something worth more than the sum of its parts. Within our walls, we're committed to fostering a diverse work environment that encompasses and nurtures people from all backgrounds, ages, races, ethnic groups, and lifestyles. Outside our walls, we've been co-creating with our customers and prominent designers around the globe to create flooring solutions that inspire. When you or your customers ask if something is possible, Tarkett's response is almost always a resounding Yes. If you can imagine it, we'll work to create it.

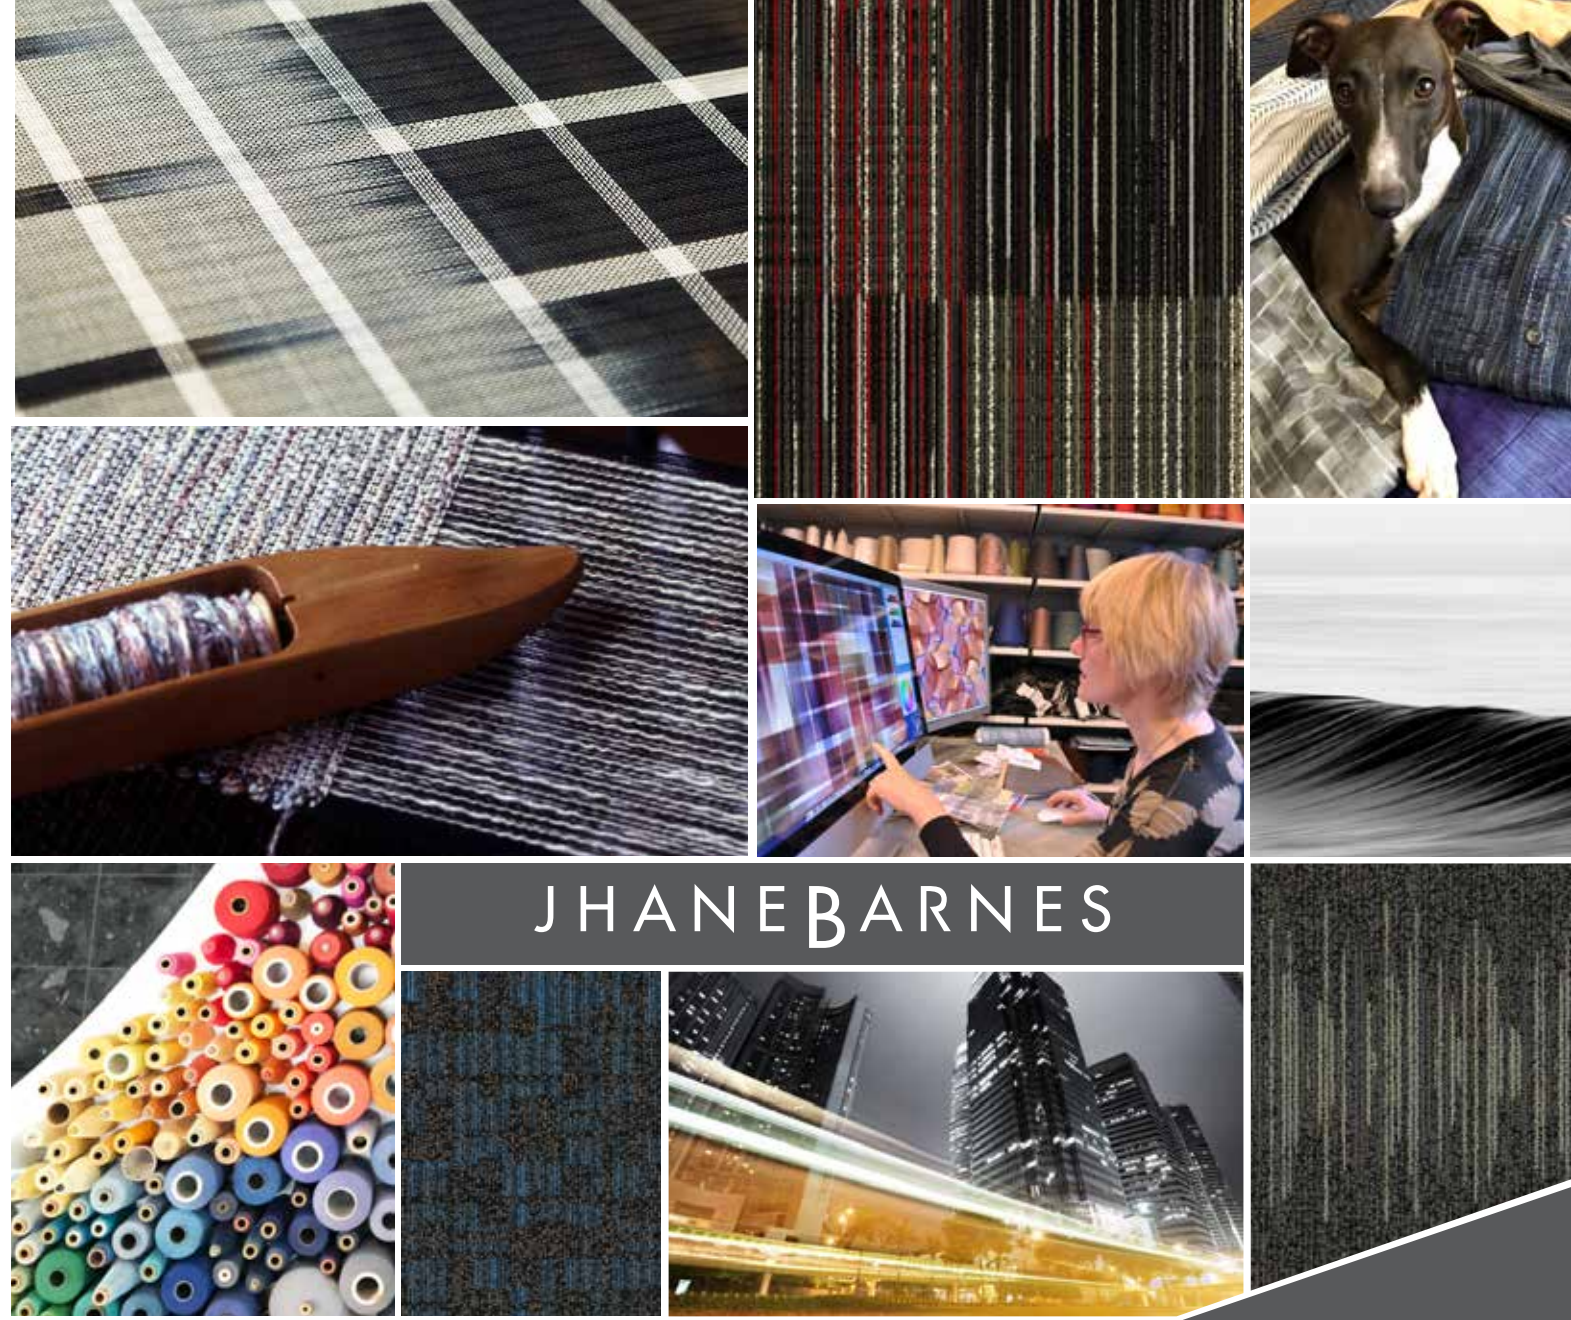

Suzanne Tick Design™

Design collaboration

Suzanne Tick is the founder of Suzanne Tick Inc., specializing in materials brand strategy, product design, development, and direction for commercial interiors. Suzanne is currently partnering with Tarkett on Brand Strategy and Product Development, Design Consultant for Tandus Centiva, Creative Director for LUUM, and Design Partner for Skyline Design. She has maintained a distinguished career as a textile designer and studio Principal in New York City. Suzanne has been a Design Consultant at Tandus Centiva since 2005 and her designs, across product platforms, have won numerous design awards and continue to break new ground in the industry. Suzanne is known for her intelligent and enthusiastic approach to design in evolving markets, along with conviction to provide innovative solutions. In addition to her work in commercial Interiors, Suzanne maintains a hand weaving practice and creates woven sculptures from repurposed materials. Her work is exhibited worldwide, including MoMA and Art Basel, as well as collected by private and corporate clients. Her recent awards include a 2016 NeoCon Best of Year Gold Award and Interior Design's Hip Award for Tarkett's Collections Infinities.

JHANE BARNES

Design collaboration

Designer Jhane Barnes uses a unique blend of science and art, incorporating fractals and algorithms into many of the products she designs. She began working with Tandu Centiva more than 20 years ago and developed the first modular products designed for random installation. Much of her career has been built on pushing boundaries, whether in her men's fashion collections, textiles, furniture, or carpet. Jhane loves learning about the machines that produce her products in order to get the most out of them. Her latest creations, "Edifice" and "Chain Reaction," are all about the integration of neutral grounds with clear saturated colors. Each design uses a special space dye yarn that interacts with all the colorways. Fusing select yarns in unexpected ways, her latest two flooring products encompass the core of her design esthetic.

Co-create. Make it your own.

Tandus Centiva's take on woven area rugs is anything but ordinary. The refined woven area rugs add regality and luxury to any interior. Area rugs allow an area to be reconfigured time and again, allowing the space's design to be changed at will. Co-create your rug with Tandus Centiva in four easy steps.

STEP 1

Visit <http://tcarearug.tarkettna.com> to choose the style and color.

STEP 2

Enter desired dimensions.

STEP 3

Select serging color.

STEP 4

Enter required customer and payment information.** Click submit.

Fast & easy. Four steps. Fifteen days. Start to finish.

A premium non-skid rug underlayment will be provided, at no charge, with each area rug.

Samples of the styles and colors available can also be ordered online. PLEASE NOTE: Samples will not be serged. Example of serging can be seen in Area Rugs architectural folder.

**MARFA.DESTINATION
MARFA, TEXAS**

The unique backdrop of Marfa, Texas serves as one of the most unconventional sites for a design conference. Long known as the base of renowned sculptor Donald Judd and the home of many of his permanent installations, Marfa has become a sought-after destination for artists and designers from around the world that are interested in the intersection of art and architecture.

This annual gathering, hosted by Tandus Centiva, shares the unique qualities of Far West Texas... the amazing topography... the delicious culturally infused food... and of course behind-the-scenes tours of the Chinati Foundation and brilliant Marfa-based artists' studios to provoke insightful discussions and inspire talented designers from all over North America.

Design
collaboration.

With its state-of-the-art digital printing technology, Tarkett is able to recreate the look of everything from natural wood grains and stone effects to your favorite upholstery. Send us an image or physical sample of any material to create a fully customized LVT flooring that's uniquely your own.

Digital printing.

LVT

POWERBOND

POWERBOND

Our carpet designs made from our library of 126 Dynex SD yarn colors can be customized with the yarn colors of your choice. You can even specify where you'd like each of your color selections to be placed in the design for a truly unique creation.

Color customization.

BROADLOOM

MODULAR

Four hands always work faster than two. That's why we created the Designer on Demand program, offering free design support during and after normal business hours. One of our designers will follow your lead and vision to help you configure a space, order samples, and create everything from room scene renderings to floor plan designs—everything you need to pull designs together quickly and share them successfully with clients. It's a perfect co-creative relationship that saves you time.

Designer on demand.

WORKING TOGETHER

At Tarkett, we believe that people are the soul of every organization. Every school. Every company. And when you place people in the center of every design decision, the result is a safer, more productive space—a space filled with people who are inspired, motivated, and free to achieve more. It's out of this belief that the Tarkett family of brands—Johnsonite, Tandus Centiva, Desso— has developed a portfolio of products designed to work together both functionally and aesthetically to help you create flawless, unified experiences and more productive workspaces.

Going the
extra mile.

We understand the constant balancing act inherent in every project. The long, often competing list of demands that can force difficult trade-offs. To help alleviate the tension, we've developed a uniquely comprehensive portfolio of soft and resilient floorcoverings—the **Tarkett Solution SPECTrum™**—to help you specify flooring products with total confidence.

The Tarkett Solution SPECTrum™ helps you expertly recommend a flooring platform for the specific needs of every space and every budget. And our full palette of colors, patterns, and textures is coordinated to work together visually across platforms. So the endless balance of function, safety, and durability is always done on budget, in style, without compromise.

In short, no one covers you better.

Spec with confidence.

Coordinate Groups are identified on product portfolios and on tandus-centiva.com by a specific number or as a Texture or Solid. Textures and Solids coordinate with nearly every style.

Coordinates are based on color, making the decision to use various styles within a project easy by selecting products within the same Coordinate Group. Styles can span product platforms of Powerbond®, Modular, Broadloom and Woven to offer ample choices when designing.

Tandus Centiva

IxD Series

POWERBOND MODULAR

This doesn't feel like work.

IxD Series unites classic high style from Tandus Centiva and Suzanne Tick, Inc. through its use of interaction design. Informed by the interactive connection between work and play, IxD speaks to how segments are merging together and unifying elements for emotional responses. IxD comprises three unique yet complementary designs: Output, Input, and Optic.

Open Archive Collection

POWERBOND MODULAR

Carpet couture.

Inspired by timeless textile designs, we introduce the Open Archive Collection. This sweeping collection offers a modern twist on iconic style. Informed by art, architecture and fashion, the Open Archive Collection elegantly updates classic looks, ushering in a new age of chic.

Influenced by fabric found in high fashion, this collection is an experimentation in the mixing of textile structure. It presents a new contrast of fiber development which has never been achieved before on the floor plane.

Crosscut Collection

POWERBOND MODULAR

High style,
affordable
price.

The new Crosscut Collection, designed by Suzanne Tick, delivers high style at a low cost. True value innovation occurs when designers can create products that are expensive looking materials at low price points, and this was the intention behind Crosscut Collection. This value innovation was developed through a combination of yarn construction, color, and pattern to create floor coverings that have a visual and textural integrity.

Investing in
the future.
Doing good
together.

At Tarkett, we believe that together, we can make a positive impact on people and the planet. That's why we're Doing Good—Together, connecting our sustainability efforts with what our customers value and our world needs. It's an active, living commitment to create a future where people and the planet prosper in balance.

Doing Good—Together means Designing for Life. A life where we respect natural resources and good materials contribute to people-friendly spaces. It means Closing the Loop, building a circular economy in which resources are responsibly stewarded, recycled and continually re-used. And Doing Good—Together means Driving Collaboration, an open invitation to our customers, our partners, and our industry to join us in creating a healthy, beautiful and sustainable world.

**DESIGNING
FOR LIFE**

Developing products based on Cradle to Cradle® principles that contribute to people-friendly spaces and respect the planet's natural capital.

**CLOSING
THE LOOP**

Building a circular economy inclusive of programs and business models that encourage take back, reuse, recycling and elimination of waste.

**DRIVING
COLLABORATION**

Inviting others to join us in Doing Good through education, collaboration, transparency and communication.

A global impact.

Doing Good—Together is inspired by the world’s most ambitious sustainability goals and organizations. From our membership in the World Economic Forum to our participation in the UN Global Compact and our alignment with the UN Sustainable Development Goals, we’re committed to big ideals and positive action, working for the health of our products, our world, and a good future for all.

Thank you for helping us make real progress on a global scale.

We are the only North American flooring manufacturer to offer both commercial and residential products that are certified asthma and allergy friendly by the Asthma & Allergy Foundation of America.

We have the industry’s most ambitious inventory of Cradle to Cradle certified products covering multiple product categories, from resilient to soft surface, and from products to adhesives to maintenance. By 2020, 100% of Tarkett’s raw materials will be third-party assessed for health and planet impacts.

Our third-party verified Material Health Statements provide a true assessment of

product ingredients and their long-term effects on people and the environment—versus the simple ingredient lists provided by other manufacturers.

By 2020, 75% of our raw materials will be recycled, rapidly renewable, or abundantly available in nature.

We’ve designed products to perform better in the long term with simple wet or dry buffing and neutral cleaning products—which means TVOC emissions are among the lowest in the flooring industry and 10 to 100 times below the world’s strictest standard.

Our robust Take Back program is the oldest in the industry, building on a legacy of more than six decades of recycling.

We are collaborating on the Responsible Use of PVC Network to mobilize the industry so that together, we can improve the impact of our products on people and our planet.

Together, we’re making an impact.

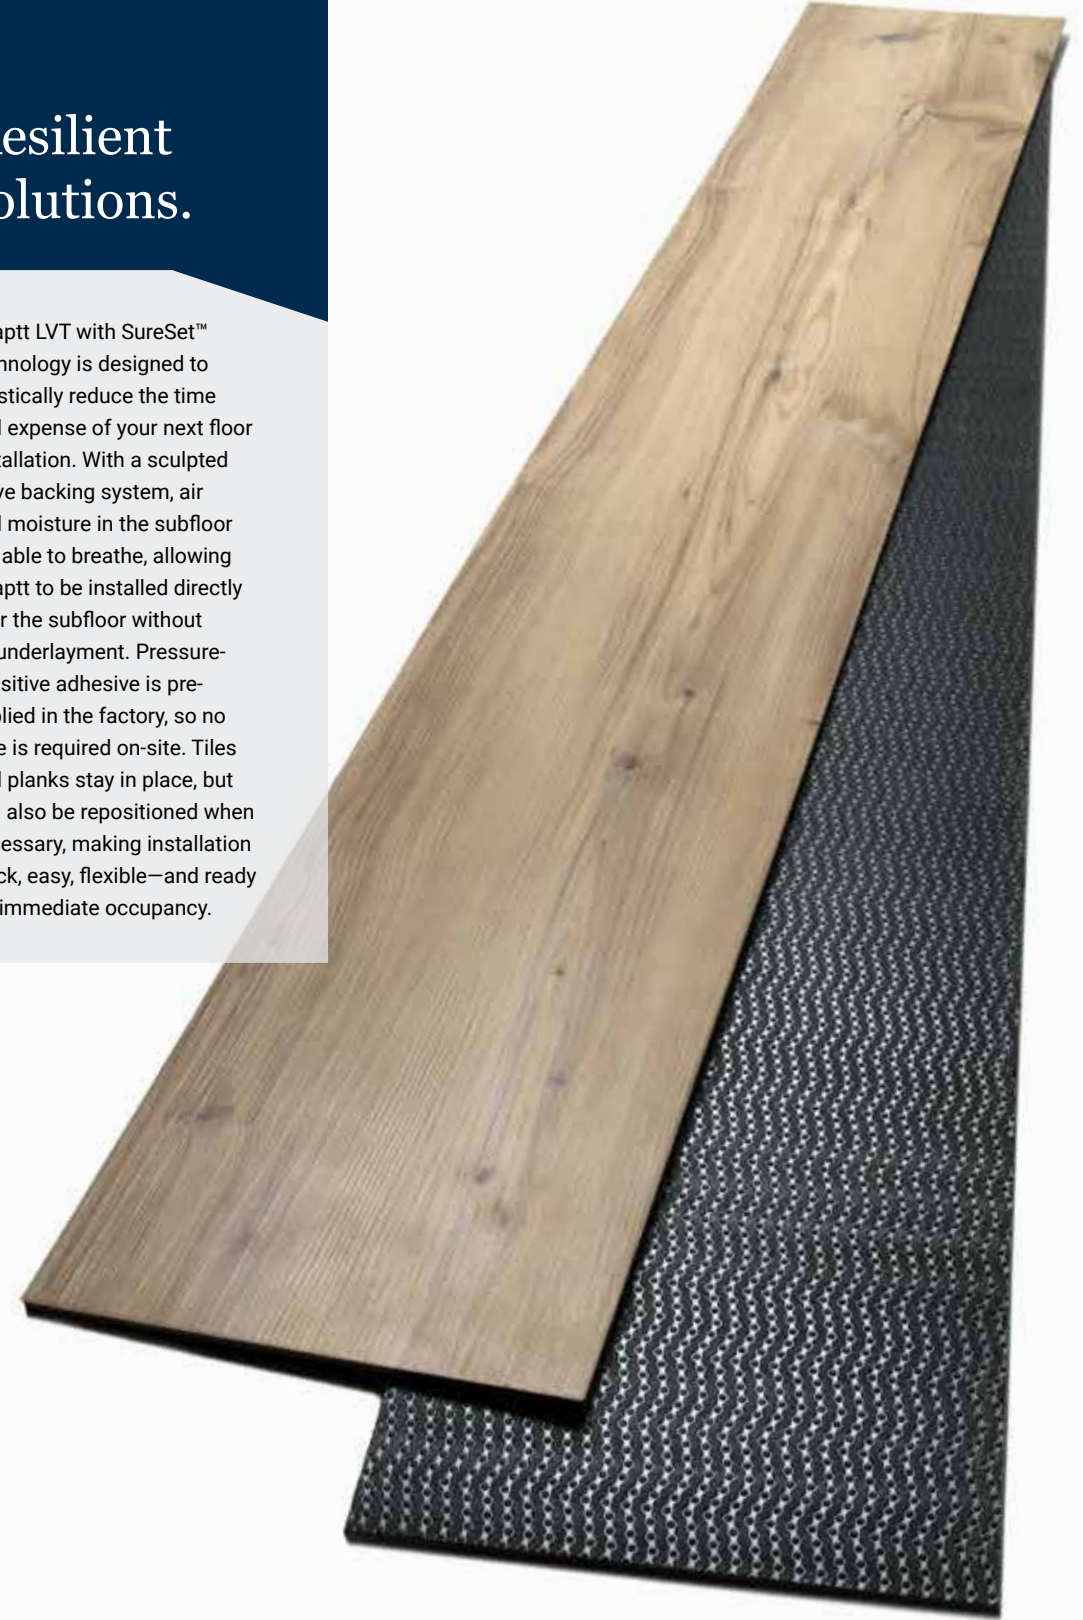

Every project comes with its own unique challenges, and Tarkett is tackling them all. From high-moisture substrates to high pressure timelines, you'll find dependable solutions in each of our product categories, including soft and resilient surfaces, underlayments and adhesives. It's another way the Tarkett Solution SPECTrum has covered.

Overcoming
adversities,
one installation
at a time.

Resilient solutions.

Adaptt LVT with SureSet™ technology is designed to drastically reduce the time and expense of your next floor installation. With a sculpted wave backing system, air and moisture in the subfloor are able to breathe, allowing Adaptt to be installed directly over the subfloor without an underlayment. Pressure-sensitive adhesive is pre-applied in the factory, so no glue is required on-site. Tiles and planks stay in place, but can also be repositioned when necessary, making installation quick, easy, flexible—and ready for immediate occupancy.

**ethos® MODULAR WITH
OMNICOAT TECHNOLOGY™**

Omnicoat Technology is the application of a proprietary coating to the backing of ethos Modular tile. Omnicoat Technology provides an excellent chemical barrier, thus preventing any interaction between materials in the backing and the wide variety of components found on and within the flooring substrate. Through this barrier property, Omnicoat Technology serves to increase the compatibility of ethos Modular with adverse and minimally prepared substrates, allowing for installations over previously incompatible adhesive types such as general purpose, styrene-based, and multipurpose.

Another
first for the
industry.

Used in conjunction with TarkettTAPE™, ethos Modular with Omnicoat Technology allows for immediate installation over adverse flooring substrates that previously required time-consuming and costly testing and floor preparation.

- pH, RH & MVER testing is eliminated²
- Install over pre-existing adhesive
- Priming not required for existing PSA meeting requirements (see website for complete list)
- Improved health, well-being & safety

² RH and MVER testing are eliminated provided that no free liquids are present and that no moisture-stained concrete is evident. In the event that free liquids and/or moisture-stained concrete are observed, a full assessment of the concrete substrate is required.

Since 1967, Powerbond® has been performing beautifully in some of the world's most high-traffic, demanding spaces and high-moisture conditions. Powerbond insulates the concrete floor from the atmosphere in the room, significantly slowing vapor transmission and hindering microbial growth. To save even more time and expense, installations utilizing #54 Seam Weld or CXL Water-based Seam Sealer will no longer require MVER testing or RH testing, as long as no free liquids are present and no moisture-strained concrete is evident.

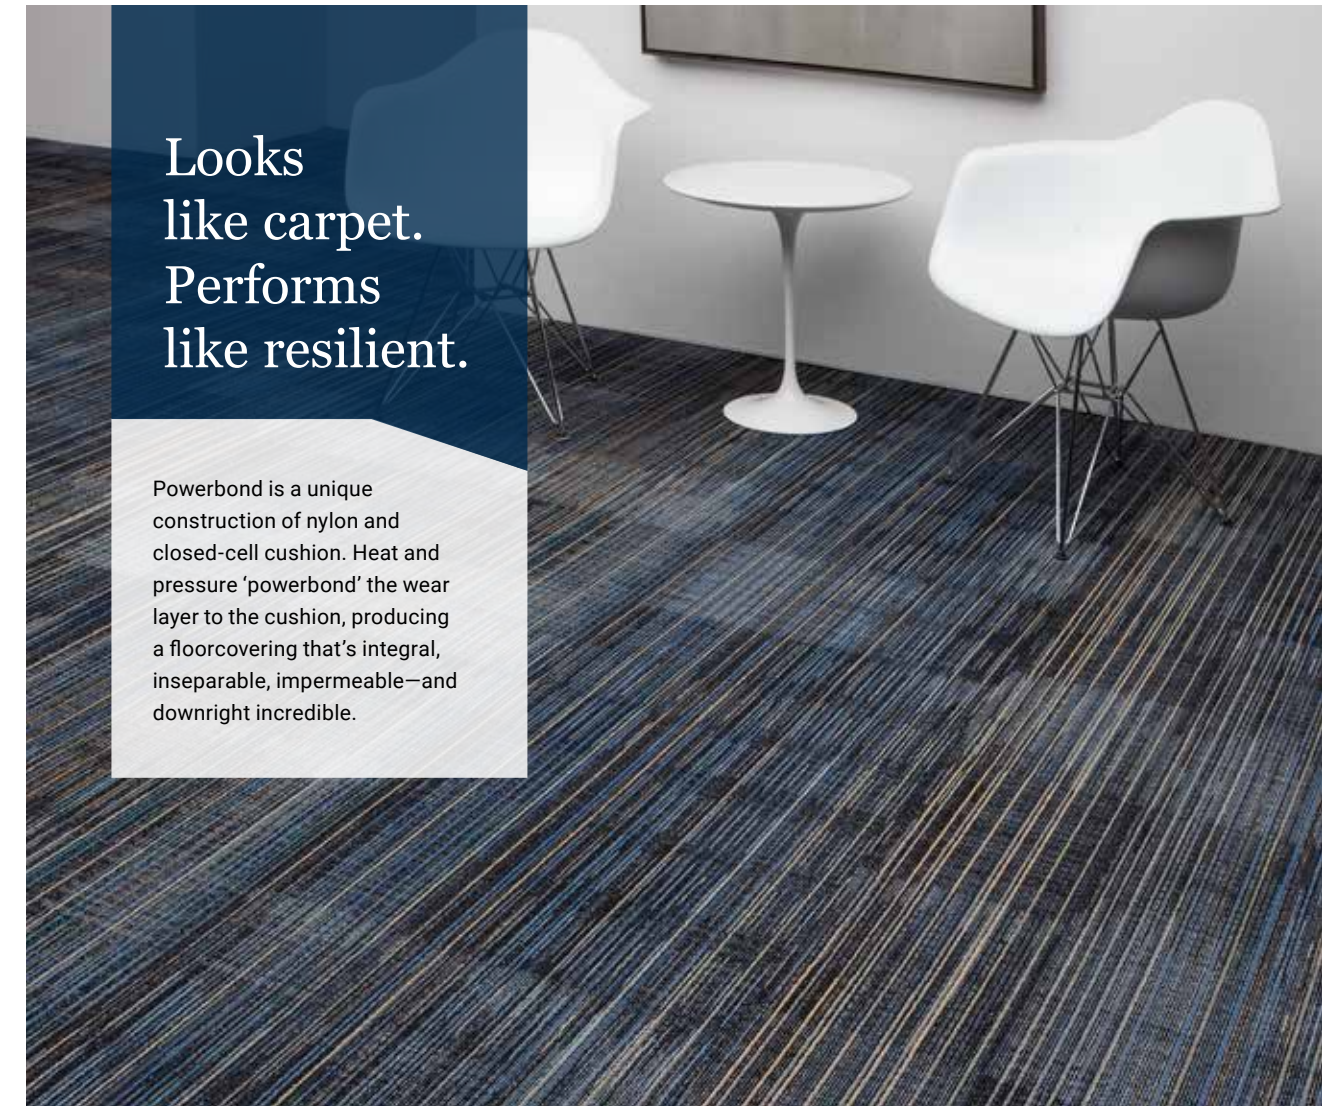

Powerbond is impermeable to liquids.

* In the event that free liquids and/or moisture-stained concrete are observed, a full assessment of the concrete substrate is required per the installation instructions.

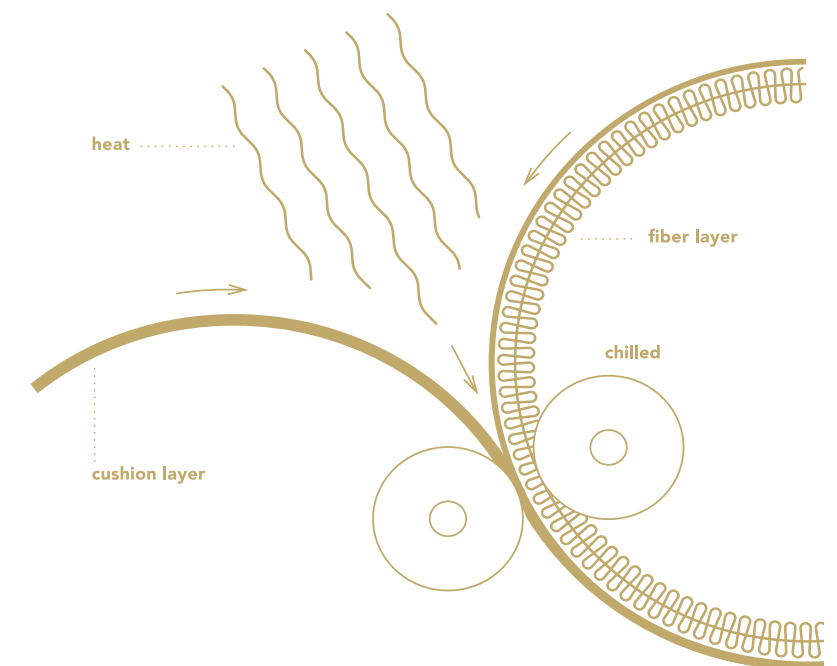

Looks like carpet.
Performs like resilient.

Powerbond is a unique construction of nylon and closed-cell cushion. Heat and pressure 'powerbond' the wear layer to the cushion, producing a floorcovering that's integral, inseparable, impermeable—and downright incredible.

Powerbond offers:

- An impermeable, wall-to-wall moisture barrier
- Soil and stain resistance
- Enhanced acoustics
- Underfoot comfort
- Low VOC emissions
- Thermal barrier

SureStart underlayment bridges minor surface imperfections in the subfloor and can be installed over concrete with a CSP ≤ 2 , resulting in accelerated install timelines and reduced labor costs associated with subfloor repair. SureStart is approved for use on most substrates located on, above or below grade and dramatically reduces moisture migration from concrete slabs.* Made of high density synthetic rubber, the underlayment delivers unmatched support under interlocking vinyl flooring, as well as significant noise reduction to the floor below.

Just unroll
and go.

* Must use approved tape at seams. See detailed installation instructions

Don't let
moisture
get you
down.

Powershield® is an underlayment intended for use with Tandus Centiva modular tile for moisture remediation. Developed in 2010, our powershield product became a flooring solution for concrete substrates with a moisture vapor emission rate (MVER) of up to 10 lbs. and a relative humidity (RH) of up to 90%. * powershield offers the same technology for our modular tile that is found in the revolutionary closed-cell cushion of Powerbond® and can be used over concrete flooring substrates in the following conditions:

- Moisture Vapor Emission Rate (MVER) up to 10 lbs
- Relative humidity of 90%
- pH up to 9

* When powershield is properly installed over concrete slabs according to previously mentioned specifications with Tandus Centiva modular tile, all applicable Tandus Centiva Modular Limited Warranty terms apply.

MODULAR CARPET

power(shield)®

CONCRETE

TARKETT TAPE™

TarkettTAPE™ is for use with ethos® Modular with Omnicoat Technology™ and Flex-Aire™ Modular.

Creating a floating installation system for modular carpet, use TarkettTAPE to install ethos® Modular with Omnicoat Technology directly over a variety of adverse substrates, including green concrete, concrete containing surface-curing additives, and chemically-abated concrete. When installed with TarkettTAPE™, ethos Modular with Omnicoat Technology is unaffected by moisture and pH, eliminating the need to test for pH, RH and MVER (provided that no free liquids are present and that no moisture-stained concrete is evident). All of which keeps your installation on schedule and your budget on track.

- TarkettTAPE installed with ethos Modular with Omnicoat Technology requires no pH, MVER or In-Situ/RH testing provided there is no evidence of free liquids.
- TarkettTAPE with Flex-Aire Modular can be installed at MVER ≤ 5.0 pounds, pH ≤ 9.0 and In-Situ/RH $\leq 80\%$.
- Odor free
- Sticks to the tile, not the floor
- Low VOCs
- Faster Installation

Supplied in self-wound perforated rolls with an outer diameter of 5" on a 3" inner diameter.

- Each tape unit measures 3" x 4" +/- 0.125" with notched perforations between each unit.
- There are 324 units per roll with a coverage area of 144 sq. yds/roll installed with 24" tile.
- Packaged from 1 to 16 rolls per box with a minimum order quantity of one roll.
- The tape unit is centered at the corner of the tile as to engage the inner section of the two adjacent and one opposing tile corners (See installation instructions for details). adhesive types such as general purpose, styrene-based, and multipurpose.

The only
product
to eliminate
pH, RH and
MVER testing.

With the TarkettTAPE system, no adhesive is required; therefore, no bond test is needed. TarkettTAPE provides a faster, simpler installation and is free from excessive waste.

INSPIRATIONS AWARDS

The Inspirations Awards, presented by Contract Magazine, in partnership with Tarkett, celebrates the commercial design profession's leadership role in social responsibility. The client of the top honoree will receive a \$10,000 grant, recognizing inspiring design.

The awards program recognizes socially responsible design in commercial architecture and design – using design and/or design skills to improve the quality of life for those in need.

Inspire greatness.

PUBLICOLOR

Publicolor is a youth development not-for-profit that has a multi-day, multi-year program continuum, which uniquely engages disaffected students in their education. Their gateway program empowers students through commercial painting and an applied learning model to transform their institutional looking schools into warm, welcoming student-centric environments. Other programs involve students in planning and preparing for college and career, while teaching strong and transferable work habits. The Summer Design Studio teaches at-risk teens literacy and math through product design. S.A.T. preparation and design classes are held on Pratt Institute's Brooklyn campus so students can experience the reality of college, while their afternoons are spent painting under-resourced but vital neighborhood facilities.

When you specify and purchase a Suzanne Tick product for a project in education, you are helping contribute to Publicolor's Summer Design Studio. Suzanne Tick Inc. and Tandus Centiva have each committed to donate \$0.10/sq. yd. from these sales, totaling a \$0.20/sq. yd. donation. Antron® Carpet Fiber has also committed to donate an additional \$0.10/sq. yd. when the Suzanne Tick Inc. design is made using Antron. With over 40 STI designs to choose from, your K-12 and higher education specifications and purchases will positively impact the lives of Publicolor students.

For more information on other ways you can get involved and support Publicolor, visit their website at publicolor.org/joinus.

Love
color.

Welcome, to
the world of
Tandus Centiva
Design, Innovation
and Co-Creation.

What constitutes the work presented in this product guide is an extraordinary collaboration and consensus of ideas, methods and materials.

Holistically interconnected, the products within speak to the commitment and purpose to innovate and manufacture floorcoverings that immediately communicate better, simpler, clearer form and function.

From the technical expertise, strength and recycled/recyclable core of our backing systems, to the beautifully engineered construction of our face fibers and design layers, all of our product platforms—Powerbond®, Modular, Broadloom, Woven, LVT and Area Rugs—are developed to align toward today's fluid, ever changing market segment reality. In this new era, products need to work with one another aesthetically, and in terms of intent, and how they must function in workplace, education, senior living, hospitality and healing environments.

This is what drives us. Our extremely dedicated staff of designers, engineers, research technicians, manufacturers and world-renowned textile consultants succeed when customers desire our floorcoverings, as much for their beauty, as for their ability to add meaning and longevity to the interior spaces they so skillfully design.

With pride and gratitude..

FLEXIBLE STANDARDS

Inspire.
Create.
Make.

We are inspired by the beauty, passion and craftsmanship that surrounds us. We have carefully curated the patterns shown throughout this section to energize your individual creativity.

Our flexible standards program allows you to select a pattern, color it using our expansive Dynex color palette, and have it produced on our high-definition, state-of-the-art tufting technology.

Make

Tailor the pattern by selecting from our expansive Dynex solution-dyed yarn library.

RESOURCES

RESTART®

Since the early 1900s, Tandus Centiva has been collecting vinyl-backed flooring from the marketplace to recycle back into flooring. We were the first in the industry to reclaim and recycle soft surface flooring from the waste stream, the first to third-party certify a recycled content product, and the industry's first to third-party certify a closed-loop reclamation and recycling program. Each day, we recycle up to 90,000 pounds of flooring and waste, totaling more than 308 million pounds to date. In addition to flooring, we also reclaim product samples and portfolios that are no longer needed in the marketplace—both our own and our competitors'.

In order to sustain the recycled content of our products, we need your help in reclaiming material. The process is easy. Just contact your Tandus Centiva account executive and leave the rest to us.

Closing
the loop.

HERE IS HOW IT WORKS:

Vinyl-Backed Carpet

- Call your Tandus Centiva account executive at 800.248.2878 and request a Material Return Form
- Submit a sample of product for approval
- Package materials securely for handling with a lift truck
- Ship materials with Material Return Request number
- Notify us 24 hours before delivery
- Tandus Centiva receives the materials for reuse or closed-loop recycling

Physical Samples

- Save the packaging you received the samples in
- Call Customer Service at 800.248.2878
- We will send you a prepaid label to affix to the packaging
- Call your carrier for pick up
- Tandus Centiva receives the materials for reuse or recycling
- Same process as above for competitive samples

Same process as above for competitive samples.

Tandus Centiva Product Portfolios

- Call Customer Service at 800.248.2878
- We will send you a prepaid label or packaging
- Pack materials with prepaid label
- Call your carrier for pick up
- Portfolios will be returned to the closest Tandus Centiva regional office for reuse

Together, we can make a significant environmental impact by keeping these materials out of the waste stream.

Thank you, in advance, for your assistance.

FREQUENTLY ASKED QUESTIONS

Is there a cost to recycle the floorcovering?

There is no charge to recycle approved floorcovering and accessories, as long as Tarkett products are being purchased to replace the reclaimed floorcovering. The cost to recycle through the ReStart Program is generally less than the cost of sending the waste to a landfill.

What can be recycled through ReStart?

All Tarkett installation waste can be returned. Any post-consumer Tandus Centiva modular carpet or Tarkett VCT can be recycled. If the product was not manufactured by Tarkett, a sample must be submitted and approved prior to returning such products.

Will you accept all product colors?

With VCT, preference is given to light colors such as beige, light grey and white. For soft surface materials, all colors are accepted. If you have any questions, please contact your Tarkett representative.

CONSTRUCTION OPTIONS

All Tandus Centiva Powerbond® and Modular options are 100% closed-loop recyclable through our ReStart® Program and do not contain pesticides (antimicrobials) as part of our initiative to reduce chemicals.

Powerbond® Cushion (RS or Non RS) – A hybrid resilient sheet floor-covering. Closed-cell cushion contains up to 19% postconsumer recycled content. Overall product contains 7-33% recycled content with a minimum 7% postconsumer. Benefits include: superior performance in extreme traffic, energy savings (good thermal attributes), reduced slip/fall injury, excellent acoustic control and wall-to-wall impermeable moisture barrier, lifetime limited warranty.

ethos® Modular (Non RS) – Made from recycled non-chlorinated polymers commonly used in windshields and other types of safety glass. Secondary backing contains 98% recycled content with a minimum 50% postconsumer, overall product contains 47-76% recycled content with a minimum 28% postconsumer, lifetime limited warranty.

ethos® Modular with Omnicoat Technology – An application of a proprietary coating to the backing of ethos Modular. Omnicoat Technology provides an excellent chemical barrier, thus preventing any interaction between materials in the backing and the wide variety of components found on and within the flooring substrates.

ER3® Modular (RS or Non RS) – Industry's first 100% recycled content secondary backing. Minimum of 45% total recycled content, overall product 14-24% postconsumer, lifetime limited warranty.

Flex-Aire™ Cushion Modular (RS or Non RS) – Affordable closed-cell cushion for enhanced comfort and acoustic properties. Secondary backing contains 35% preconsumer recycled content. Overall product contains 21-38% recycled content with a minimum 5% postconsumer, lifetime limited warranty.

**RS is a peel & stick installation method. It is the lowest VOC adhesive system in the industry.*

Super-Lok® was developed to provide customers with superior attributes to the standard industry backing systems. Super-Lok is the benchmark backing on many of Tandus Centiva's broadloom carpets and has met or exceeded all industry required testing. Super-Lok provides the following attributes – enriched synthetic latex, improved protection against edge ravel, improved protection against delamination, low Volatile Organic Compounds (VOC), excellent tuft bind, excellent rollability, easy to install, 10 year warranty.

LifeLONG® is a high-performance Tandus Centiva commercial broadloom backing system developed by Tandus Centiva Technologies. LifeLONG was developed to meet the demanding requirements of the commercial marketplace. LifeLONG is an available option for all styles constructed with the Super-Lok Backing System. In addition to providing the same attributes, LifeLONG also offers the following characteristics and benefits – recycled content (for LEED™ Certification), 20 year non-prorated warranty, improved lamination strength, increased edge ravel warranty, increased lamination warranty, passed Modified British Spill Test, maintains flexibility over a wide range of temperatures.

ErgoStep® backing is a high density polyurethane cushion. It was developed to provide customers with a product to satisfy installation requirements such as extra cushion comfort, and noise reduction. ErgoStep Backing is available for all Tandus Centiva broadloom products and provides the following attributes – cushion comfort, reduced fall impact, extended product life, minimized edge ravel, moisture management, enhanced thermal properties, and flexibility over a wide range of temperatures. ErgoStep contains a minimum of 30% postconsumer recycled content and overall product postconsumer recycled content of 8-10%. ErgoStep with BiOH™ adds 8.6% of bio-based content derived from soy bean oil. This custom backing option is available by special order and minimum yardage is required. 10 year warranty.

Crossweave® Woven technology was engineered for exceptional long-term performance. Tandus Centiva's Crossweave looms weave pile and backing yarns together to create one integral unit. Pile yarns are inter-laced to provide woven carpets' famous resistance to delamination and yarn zippering. Every woven broadloom is constructed and crafted with superior performance features including exceptional seaming properties and dimensional stability, 15 year warranty.

CrossCushion® Woven provides added comfort underfoot and extends the life cycle of Crossweave Woven Technology. CrossCushion is an attached high-density polyurethane cushion. In addition to the attributes inherent in Crossweave woven construction, CrossCushion offers the following characteristics and benefits – reduced fall impact, enhanced acoustics, moisture impediment, reduced crushing, enhanced thermal properties. CrossCushion contains a minimum of 30% postconsumer recycled content and overall product post-consumer recycled content of 8-10%. CrossCushion with BiOH™ adds 8.6% of bio-based content derived from soy bean oil. This custom backing option is available by special order and minimum yardage is required. 15 year warranty.
