

TARKETT'S BALANCED CHOICE

The Wood ranges are part of Tarkett's choice of sustainable solutions. It is an integrated system that allows you to balance all the competing needs, while making choices that are truly sustainable and work together aesthetically.

VIVA, EPOQUE, TANGO

WOOD

Where we can use natural, renewable resources, we do.

Using fewer resources is good for the environment and the bottom line.

We make floors that are healthier and safer.

We use more recycled content at the start and recycle more product at the end.

Better Raw Materials

Our wood ranges are made of 99%* natural, renewable material from controlled sources that meet our standards of sustainable forestry or are certified by PEFC and/or FSC.

*Viva range: 88%

Resource Stewardship

The Viva, Epoque and Tango ranges are produced in Orzechowo, Poland. The factory applies an environmental management system (ISO 14001). Since the factory started two years ago, we have made several improvements.

- 12% reduction in energy consumption.
- 42% of all energy consumed is produced by recycling sawdust as a biofuel.

→ All Tarkett plants are externally audited for environmental risk assessment

People-friendly Spaces

Our wood ranges deliver valuable health, hygiene and welfare benefits:

- Proteco surface treatment is the strongest on the market, delivering benefits like easy cleaning, no chemicals needed for everyday care and a longer service life.
- Very low VOC emissions of 20 µg/m³ at 28 days – more than 50 times below demands in European Standard (1000 µg/m³), contributing to good indoor air quality.
- Formaldehyde emissions ten times lower than the E1 standard
- Quick and easy product installation with no need for glue (convenient click system).
- Feels warm and comfortable to walk on thanks to good thermal resistance (0.10-0.13 m²K/W on 12-14 mm multilayer wood floor).
- Tarkett's wood floors can be re-sanded up to 4-5 times**, which extends the flooring's life time and gives it a favourable Life Cycle Cost.

→ Test reports available on request

**Not valid for Viva

Reuse and Recycle

Used flooring can be removed and reused or used as an energy source.
